Do I need to purchase reagents separately?

This article was retrieved from support.mrcholland.com on Friday, 10th May 2024.

SALSA® MLPA® and digitalMLPA™ reagents are supplied in reagent kits. These reagent kits contain all general reagents that you need from MRC Holland, with the exception of an application-specific probemix. Reagent kits are *not* included with the purchase of an MLPA or digitalMLPA probemix, and must be ordered separately. A single reagent kit can be used together with multiple application-specific probemixes.

Note

Reagent Kits do not include [SALSA HhaI](#), which is required for methylation analysis, optional reagents and general laboratory reagents. See the [\(MS-\)MLPA](#) and [digitalMLPA](#) protocols for details.

SALSA Melt Assay reagents are part of the assay itself and *are* included with the purchase of a Melt Assay.

The reagents in MLPA and digitalMLPA reagent kits can be purchased individually, but this is not recommended in most situations. Reagents for Melt Assays cannot be purchased individually.

More information about the available MLPA and digitalMLPA reagent kits and other reagents can be found on our [Reagents page](#).
