Is it possible to use SALSA (digital)MLPA probes on DNA derived from non-human organisms?

This article was retrieved from support.mrcholland.com on Thursday, 18th April 2024.

No, it is not possible to use SALSA® MLPA® or SALSA® digitalMLPA™ products on non-human derived DNA. It is very likely that one or more mismatches exist in other organisms. These mismatches are likely to disrupt the probe's ligation or its hybridization to the sample DNA.

The MLPA can be applied to DNA derived from other organisms, but we offer no support for this.
