## MLPA - virtual workshops

This article was retrieved from support.mrcholland.com on Saturday, 21st May 2022.

### Virtual workshop: MLPA raw data evaluation and troubleshooting

Learn to recognise and troubleshoot common MLPA problems in our interactive half-day virtual raw data evaluation and troubleshooting workshop. See our scheduled virtual workshops on our [events page](#).

We also offer in-person workshops and webinars. For an overview, see [this page](#).

### Program

#### *MLPA raw data evaluation and troubleshooting*

MLPA raw data and peak pattern analysis using examples from daily practice.  
Instructions on how to recognise and solve common problems with MLPA data.

#### *Practical session MLPA raw data evaluation and troubleshooting*

Several cases of problematic MLPA experiments are analysed by the participants and responses are recorded via virtual polling.

### Practical information

Participants must have a computer and access to a reliable internet connection. The computer must have one of the following browsers installed: Chrome, Safari, or Firefox. Due to the interactive nature of the workshop all participants must use their own computer. It is not possible for multiple participants to join the workshop from one registration/computer. Participants who are present and actively participate for the entire virtual workshop as measured by polling responses will receive a certificate of completion.

### For whom?

A basic understanding of the MLPA technique as well as hands-on experience with MLPA is required. Experience with MRC Holland's free Coffalyser.Net software is not required. All virtual workshops are held in English unless stated otherwise.

### Registration

Fill out our [contact form](#) to register. Please specify the date of the virtual workshop that you would like to register for.

The registration fee for MLPA virtual workshops is currently free. Space is limited, so please reserve your spot in time.
