What keyboard shortcuts can I use in Coffalyser.Net?

This article was retrieved from support.mrcholland.com on Sunday, 11th May 2025.

Note

This article is part of the [Coffalyser.Net Tips & Tricks](#) collection.

Coffalyser.Net supports a large number of keyboard shortcuts to minimise the number of mouse clicks required to analyse an experiment. The most important shortcuts are listed below divided into two sections: [shortcuts specific to certain dialogs](#) that can be useful during the analysis workflow, and more [general shortcuts](#) for things like saving/exporting data. You can also view the full list of available shortcuts in a [list organized per dialog](#).

Shortcuts specific to certain dialogs

These shortcuts work in a specific dialog or tab, and can be useful to speed up your analysis workflow.

Expenditures on health care in the United States are projected to rise sharply in the coming decades. Only a few countries in the world have managed to keep health care costs under control. This report examines the reasons for the rapid increase in health care costs in the United States and offers suggestions for how to slow the growth of these costs. The report also discusses the impact of health care costs on the economy and on the quality of life.

Compared to other countries, the United States spends a large amount of money on health care. This report examines the reasons for the rapid increase in health care costs in the United States and offers suggestions for how to slow the growth of these costs. The report also discusses the impact of health care costs on the economy and on the quality of life.

* Note that these shortcuts do not work with the numeric keys on the numpad.

General shortcuts

Some shortcuts work in multiple places in the Fragment Analysis Sample Results Explorer, the Comparative Analysis Experiment Explorer and the Comparative Analysis Sample Results Explorer. Many of these shortcuts work differently in dialogs with grids (spreadsheet-like lists with values) or charts (e.g. ratio charts and electropherograms).
