Why do Coffalyser.Net and Coffalyser digitalMLPA require a license?

This article was retrieved from MRC Holland Support (support.mrcholland.com) on Friday, 4th July 2025.

Coffalyser.Net™ and Coffalyser digitalMLPA™ are free and will remain free in the future. You are still required to generate a free license for two main reasons: to allow us to contact you, and to ensure that you use an up-to-date version of the software.

Background

We need to be able to contact you in case of important (safety) notifications about the software. Registration of your email address is required before you can generate a license, which ensures that we are able to get in touch. We will only contact you sporadically – see our [privacy policy](#) for more information.

Important

It is your responsibility to ensure that your email address remains up to date. [Contact us](#) if you need help changing your email address. [Find](#) the email address associated with your license.

We also use the licensing system to ensure that older versions of the software are no longer used. All licenses periodically expire, at which point they must be renewed via a simple procedure. If we release an updated version of the software, we will (eventually) stop renewing the licenses of older versions. This ensures that you always use an up-to-date version, and that everyone benefits from the latest improvements.

Note

Read how to renew your license for [Coffalyser.Net](#) and [Coffalyser digitalMLPA](#).
